

**MODEL#: NB-TH**

**Needle Bearing - Tool Holder**

This holder is designed for use with Right Angle Drivers so that they can rotate freely to your horizontal fastener alignment without any torque reaction. NB-TH has a large needle bearing assembly, flanked by 2 thrust bearing assemblies and completely encased in a precisely machined aluminum housing with 50mm (1.96") ID clearance for the tool handle. **NB-TH weighs 2.6 lbs (1.18 Kg) so it is compatible with 815, 1015 and 1025 frames only.**

**This holder is semi-custom, typically needing additional engineering for your application.**

**Contact ETA or an ETA Authorized Distributor for more info and a quote.**
